

Polflex-Lok Quick Connect System

polyflex
Specialist Distributor

Stringent testing on-going in a Hydro demolition environment. No problems after 7 months of use

21st century hose safety technology for today's demanding applications

Introducing the latest design in Quick connect & release hose connection systems.

Which also provides hose burst protection up to 3000 bar Working Pressure.

It's unique benefit is that the system will not operate without providing protection for the user.

Hull & Tank cleaning in Dubai docks in a high time utilisation environment. No problems after 7 months of use.

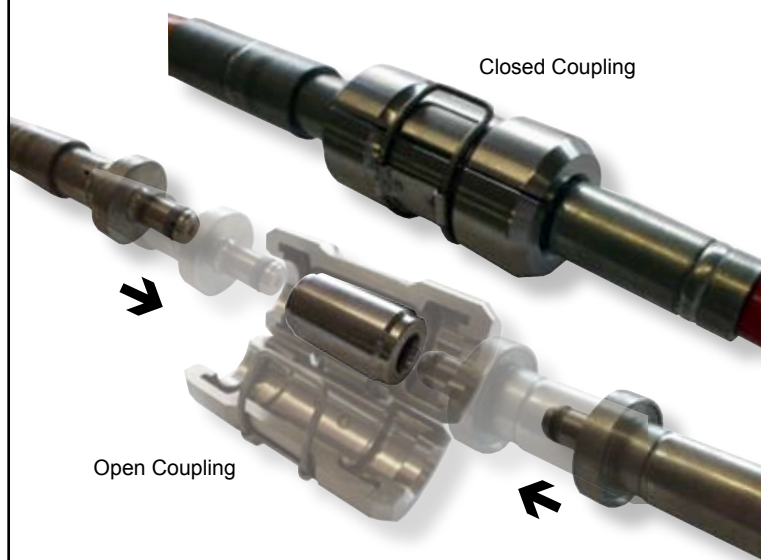

Features

- Easy, fast, comfortable & safe
- Use on hose up to 3000 bar MWP
- Uses only 2 working parts
- Integral Burst & Hose Abrasion protection
- Replaces rotary joints
- No tools required
- If assembled incorrectly - will not work
- Safety factor 2.5 times (Burst pressure)
- Ready now for hose I/D's 5, 8 & 12mm. 20mm to follow soon

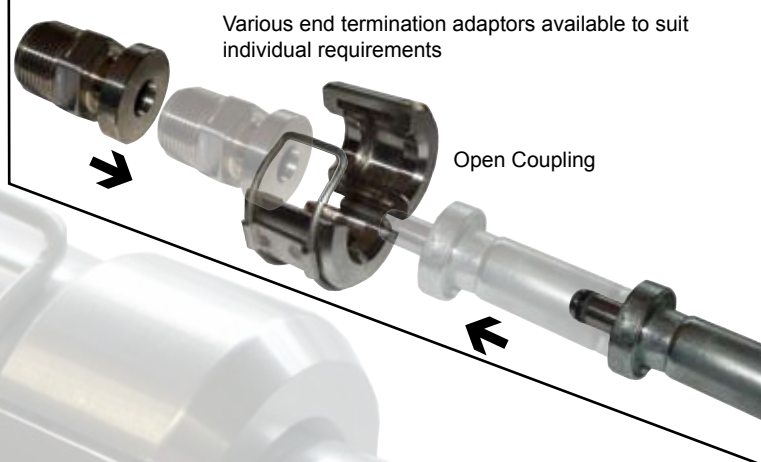

Benefits

- Less wear on components – fewer part "change outs" needed
- Faster assembly / disassembly of hoses – saving valuable job time
- Easy Handling & compact design- Less operator fatigue – more output
- Hose twisting eliminated – longer hose life
- Operator protection assured

Hose to Hose Connection

Hose to Pump or Jetting Gun Connection
